

Famed Stradivarius Violin Discovered By Samson Resident

Antonio Stradivari, maker of the world's finest violins, died more than 200 years ago. But the search for his priceless instruments still goes on. Stradivari made an estimated 1,116 instruments between 1665 and 1737, the year of his death at age 93. The famed Italian's instruments are valued today from \$15,000.00 to \$50,000.00, and more.

W. M. (Neil) Feaster, 10 South Wise Street, Samson, Alabama, claims he has one of the famed "fiddles."

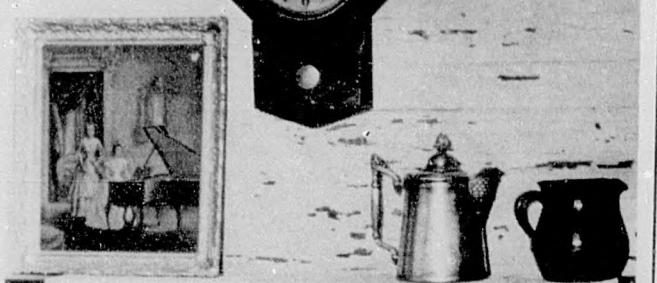

Feaster, born and raised four miles west of Andalusia on a 160 acre farm, told editors of this newspaper in an exclusive interview that his father gave him the "Strad" in 1907, the event being his seventeenth birthday. Feaster said that his father (J. L. Feaster, born in the Carolinas) got the violin from his father (Neil's grandfather) who brought the instrument from Germany over 200 years ago. The grandfather got the violin from Italy.

NEIL FEASTER, who said his father played the violin left-handed over the base, said that the strings are the original ones when he got it some fifty-six years ago. Before that, Neil Feaster doesn't recall about the strings.

Feaster has been offered \$36,000.00 for the instrument but refused because payment was offered in check form. "The Strad" is for sale to the highest bidder, and for cash."

Inside the violin can be seen what is believed an authentic label. The worn label reads "Antonio Stradivari, Cremona, Faciebat Anno 1717."

U. S. traffic accidents claimed 38,000 lives in 1961. More than three-quarters of these fatalities occurred on rural roads and highways.

FEASTER, WITH HIS SUPPOSED "STRAD", told this newspaper recently that the instrument was the owner of one of the violins over 200 years ago.

In background is an old picture given to Feaster by his mother many years ago. The containers were given to Feaster by his mother also, which was given to her by her mother.

The old clock in the picture is a Seth Thomas, which was made before makers knew how to make the clock strike.

A host of friends and relatives from Elba, Panama City, Montgomery, Mobile, and other places called to extend congratulations and good wishes to this much loved couple.

FARM BRIEF
A 4-H Club is an organized group of young people who carry on educational projects and activities under the guidance of Extension Service and a volunteer local 4-H leader.

SEATS in superionic places should be built to accommodate comfortably and safely a 225-pound man rather than the 170-pounders planners had in mind when designing today's commercial transports, say the Civil Aeronautics Administration, Federal Aviation Agency. At 170 pounds, the institute points out, the inertia of the seat in impact is greatly accelerated. The result is a heavier impact on the passenger's head and neck.

Electrical circuit wires that heat above 140 degrees are definitely over-loaded. Electricity used in producing this heat is wasted and often means paying a bigger power bill.

Fire is not an effective method of killing honeybees except as a pre-treatment for herbicide applications.

The 4-H Club has now spread to more than 70 foreign countries. These clubs have an estimated membership of more than five million boys and girls.

to

DOCTOR EVIL AND HIS TERRORS OF THE UNKNOWN.
If it's thrills you want, it's thrills you will get when you see the man who brings back the dead, Doctor Evil, in his big Terrors of the Unknown stage show playing at the Elba Theatre, on Thursday night, November 7. Mrs. Whitley, manager of the Elba Theatre, says the triple shock stage show will also feature in person, KING KONG, the famous Hollywood gorilla, and the Mummy, and portions of the show are too scary to advertise. Also twist contest. Register for the theatre's jack pot prize.

Farmers Should Protect Land, Property From Fire Damage-Contact Rangers

Coffee County farmers and landowners have a responsibility to protect their land and property from fire damage. During the past several weeks, the potential fire hazards have greatly increased. Every day that a good rain is delayed, increases this hazard.

Gordon Drewery, our Forest Fire Ranger here in Coffee County, is doing an excellent job in working to prevent disastrous fires. Drewery pointed out that fire lanes should be prepared just as soon as possible in those areas where fires do not exist. Fire lanes should be prepared adjacent to roads near the right of way. Lanes can

also be prepared through timberland - both natural and planted land. Fire lanes should be 8-12 feet wide. Old lanes should be re-plowed and reharrowed at least three times a year.

Drewery pointed out that a bush-hog would not cut a good fire lane. Bush-hogs pack the material down, and this won't stop the fire from crossing over. He recommends turning with a bottom plow or with a harrow and making sure that the surface of the ground is clean.

The Forest Rangers can be reached by calling them in Elba. The numbers are 897-6400; 897-6620; 897-2314; or 897-2741.

Sabin Vaccine

Continued From Front

from many civic groups. By the time we get rolling," he said, "we hope to have close to 500 or 600 persons in the area playing important roles."

"Even those persons who have been inoculated with the Salk injectable vaccine should take the Sabin oral vaccine," Doctor Kimmey said.

Doctor Bancroft Cooper, who is the Society's director for the campaign explained that the tasteless polio vaccine is administered on a sugar cube. "You chew the sugar cube and swallow it. Then, you're immune," he said. "That's all there is to it."

"The Sabin Vaccine has been given to more than 100 million persons throughout the world," Doctor Cooper said, "and it has been given with complete safety."

In March of this year, Surgeon General Luther L. Terry stated that the vaccine will be used not only to prevent polio but also to stamp out wild strains of the virus which are present in the community. The live oral vaccine can do this, experts believe, because its action takes place in the gastro-intestinal tract where polio viruses normally multiply.

Unlike the Salk injectable polio vaccine available since 1955, the Sabin vaccine is swallowed. For infants, it will be given by dropper.

Bill Pierce, the Medical Society's Assistant Director for the campaign, advises that the vaccine will be administered from the following schools from noon to 6 p.m. on November 10:

Elba High School, Mulberry School, Kinston High School, New Brockton College High School, Zion Chapel High School, Enterprise High School, Carroll Street Elementary School, Coppinville High School.

Civil Rights

Continued From Front

In any state or federal election he chooses. The Attorney General is empowered to set aside the local voting officials. He need only allege to a federal court that less than 15 per cent of the prospective qualified voters of any race have not been registered in that district.

Without taking evidence or making any finding, the court must immediately appoint temporary federal voting referees. The federal referees will then interpret the qualifications of applicants as they see fit. And then the election will be held.

After the election has been decided, the court will proceed to take evidence on the Attorney General's allegation. If it is found to be weak or in error, it will be dismissed, and the unqualified voters removed from the rolls.

But whatever the final outcome of the complaint, the election is valid.

Civil rights experts have concluded that this procedure violates the due process of law which is guaranteed to all citizens by the Fifth Amendment to the Constitution. Due process requires that no matter be decided until after hearings and a fair trial. But the method chosen by the President allows the Attorney General to attain his desired end before the case is decided.

For these reasons, more observers feel that this extension of the Attorney General's power into the everyday lives of citizens is a disturbing prospect. They feel that the President's civil rights bill consists of 90 per cent federal power and 10 per cent civil rights.

Succeeding-

Next to succeeding yourself, there is no gratification equal to starting in the success of somebody you like, be it husband, wife, daughter, son, fraternity brother, bartender, or United States Senator.

Coffee County High School News

On Thursday night, October 10, the Kinston Senior Class presented "Talent and Beauty Night." Entries in the talent were from the overall school while the beauty contest concerned the upper four grades with a winning beauty from each class.

In the beauty contest the entries were narrowed to three from each class. These three were asked a question and the winners were chosen from them. The contestants were judged by out-of-town judges on beauty, poise, and personality.

The winning Freshman Beauty was Linda Bailey;

Sophomore Beauty, Margaret Blair; Junior Beauty, Claudine Bowdoin; and Senior Beauty, Martha Moody. These girls' pictures will appear in the 1963-64 "Kinstonian."

The winning talent number was the entry by Misses Eulene Phillips and Martha Moody singing "Pineapple Princess" and "My Happiness," accompanied by Miss Teresa Wise on the piano. These girls were dressed in costumes alike to carry out the theme of their number.

Music, rendered by Dean Daughtry on the piano, was enjoyed during the intermissions.

Mulberry High N.F.A. Hold Annual Initiation

The Mulberry Heights High School Chapter of New Farmers of America held its annual initiation, Thursday night, October 24th, in the Vocational Agriculture Department, to initiate new members.

Probation period began Wednesday morning, October 23 and lasted until the final initiation period. Members who made it across the burning sand were:

Fred Adams, Simon Benson, Wallace Bruton, Willis Bruton, Charlie Coon, Jesse Cook, Ned Germany, John Hooks, Willie G. Hooks, Paul Phillips, Charlie Rowe, Samuel Smith, Ronald Smith, Willie L. Siler, Owen Thomas, Willie C. Trills and Jerry Young.

The dean of pledges were Ira Paul Hall, with Willie C. Lee as his assistant.

Harold Williams is NFA President and James L. Dawson is Vocational Agriculture teacher and N.F.A. Advisor.

Farm Affairs

With
Thomas C. Cassaday
COUNTY AGENT

Cows shouldn't associate with hogs; however, not because they're any higher on the social ladder, it's just that they sometimes get the "mad itch" when they're around pigs or hogs.

According to Dr. V. D. McCreary, head of the State Diagnostic Laboratory in Elba, practically all hogs are carriers of a virus which causes Aujeszky's disease, commonly called "mad itch." Although

it doesn't seem to affect hogs, cows with the disease react much as if they had rabies.

Auburn University's County Agent, Tom Cassaday, reports that one farmer in the Pine Level Community recently lost 12 cows.

"However, this doesn't mean we're going to have an epidemic of 'mad itch' among Coffee County cattle," he says. "This may be just a localized case, but I strongly recommend farmers to separate cows and hogs. Still, the fact that this outbreak has occurred might mean other farmers will be similarly affected, which could add up to considerable losses."

The county agent adds that although there's no cure for this disease, it's easy to prevent—just by not housing or fencing hogs and cows together.

Jehovah's Witnesses' Fall Circuit

Convention Successful

The New Brockton delegation of Jehovah's Witnesses completed their role as delegates Sunday, October 20, when the group's fall circuit convention closed in Meridian, Mississippi.

What all vo-ag teachers throughout Alabama do recommend is that unused acres not remain idle. Less, cover crops, and recreational enterprises are only two suggestions for their use, there are many more. The important thing is that something beneficial and worthwhile be done with all the land in the State.

According to Grady Harper, spokesman for the local congregation, the assembly attracted delegates from many parts of Alabama and Mississippi. Peak attendance reached 640 last Sunday, when James A. Hinderer, district director of the Watchtower Bible and Tract Society, delivered a special public talk on the subject, "The Bible Triumphs in a Scientific World."

Over 100 witnesses freely volunteered their services and a successful meeting was held in Meridian.

Annual Work Conference Stated

November 4, 5, & 6

Walter C. Head, Jr., director of the Alabama Department of Veterans Affairs, stated today that plans have now been completed for the Department's Annual Work Conference which will be held in Montgomery, on November 4, 5, and 6.

During the three-day conference, employees of the Department will undergo intensive training on the newest laws and regulations governing the field of veterans' affairs. In addition, a thorough review will be made of all phases of veterans' affairs.

Head announced that Maxwel Reeves, VSO for Coffee County, whose office is located in Elba and Enterprise, will be present at the three-day meeting and his office will be closed during that time, but will reopen on Thursday, November 7.

Many experts in the field of veterans' affairs will be in attendance for the meeting. In addition to all personnel of the Department of Veterans Affairs, participants will include Veterans Administration officials from the Regional Office in Montgomery, and representatives from all VA Hospitals in Alabama.

Others who will address the Conference and remain in attendance to answer queries include:

A. W. Farmer, director of Compensation and Pension Service, VA Central Office, Washington, D.C.; Hugh W. Bradley, director of the Bureau of Veterans Reemployment Rights, Department of Labor, Washington, D.C.; Dr. Thomas L. Harvey, area medical director from the VA Central Office, Washington, D.C.; Neil R. Smart, manager of the VA Regional Office, Montgomery; and J. J. Corcoran, director of Rehabilitation Commission, Washington, D.C.

A good spray schedule is necessary to prevent disease and insect damage on late summer and fall tomatoes.

Alabama 4-H Clubs provide informal, educational opportunities for well-rounded growth of young people capable of assuming responsibilities of leadership.

Most public recreational areas need to be close to town, and easily accessible. However, some facilities need to be hidden from general usage; the favorite fishing hole, or a haunt for artists and nature lovers can draw people from great distances.

Vo-ag teachers advise that a slow, and modest beginning is the best one for going into the recreational field. It costs little, for example, to make unused land available for riders clubs, or hunters, while dredging a creek for a swimming spot, or constructing camping facilities may be too ambitious a start in an untried market.

It is also recommended that beginners choose a past-time that they are familiar with, and one which they enjoy themselves. A good fisherman will provide the best fishing for his paying guests. And, a young farmer with an appreciation for photography will know good scenery when he sees it.

These are just some of the things to be considered before starting a recreational business on unused crop land. Along with them is the need for a-bout liability insurance, competition, the amount of work involved, financing, and the slow going during the first years. But, with luck, hard work, and careful planning non-productive farm land can bring in good income.

It costs little, for example, to make unused land available for riders clubs, or hunters, while dredging a creek for a swimming spot, or constructing camping facilities may be too ambitious a start in an untried market.

It is also recommended that beginners choose a past-time that they are familiar with, and one which they enjoy themselves. A good fisherman will provide the best fishing for his paying guests. And, a young farmer with an appreciation for photography will know good scenery when he sees it.

These are just some of the things to be considered before starting a recreational business on unused crop land. Along with them is the need for a-bout liability insurance, competition, the amount of work involved, financing, and the slow going during the first years. But, with luck, hard work, and careful planning non-productive farm land can bring in good income.

What all vo-ag teachers throughout Alabama do recommend is that unused acres not remain idle. Less, cover crops, and recreational enterprises are only two suggestions for their use, there are many more. The important thing is that something beneficial and worthwhile be done with all the land in the State.

According to Grady Harper, spokesman for the local congregation, the assembly attracted delegates from many parts of Alabama and Mississippi. Peak attendance reached 640 last Sunday, when James A. Hinderer, district director of the Watchtower Bible and Tract Society, delivered a special public talk on the subject, "The Bible Triumphs in a Scientific World."

Over 100 witnesses freely volunteered their services and a successful meeting was held in Meridian.

Annual Work Conference Stated

November 4, 5, & 6

Walter C. Head, Jr., director of the Alabama Department of Veterans Affairs, stated today that plans have now been completed for the Department's Annual Work Conference which will be held in Montgomery, on November 4, 5, and 6.

During the three-day conference, employees of the Department will undergo intensive training on the newest laws and regulations governing the field of veterans' affairs. In addition, a thorough review will be made of all phases of veterans' affairs.

Head announced that Maxwel Reeves, VSO for Coffee County, whose office is located in Elba and Enterprise, will be present at the three-day meeting and his office will be closed during that time, but will reopen on Thursday, November 7.

Many experts in the field of veterans' affairs will be in attendance for the meeting. In addition to all personnel of the Department of Veterans Affairs, participants will include Veterans Administration officials from the Regional Office in Montgomery, and representatives from all VA Hospitals in Alabama.

Others who will address the Conference and remain in attendance to answer queries include:

A. W. Farmer, director of Compensation and Pension Service, VA Central Office, Washington, D.C.; Hugh W. Bradley, director of the Bureau of Veterans Reemployment Rights, Department of Labor, Washington, D.C.; Dr. Thomas L. Harvey, area medical director from the VA Central Office, Washington, D.C.; Neil R. Smart, manager of the VA Regional Office, Montgomery; and J. J. Corcoran, director of Rehabilitation Commission, Washington, D.C.

A good spray schedule is necessary to prevent disease and insect damage on late summer and fall tomatoes.

Alabama 4-H Clubs provide informal, educational opportunities for well-rounded growth of young people capable of assuming responsibilities of leadership.

Most public recreational areas need to be close to town, and easily accessible. However, some facilities need to be hidden from general usage; the favorite fishing hole, or a haunt for artists and nature lovers can draw people from great distances.

Vo-ag teachers advise that a slow, and modest beginning is the best one for going into the recreational field. It costs little, for example, to make unused land available for riders clubs, or hunters, while dredging a creek for a swimming spot, or constructing camping facilities may be too ambitious a start in an untried market.

It is also recommended that beginners choose a past-time that they are familiar with, and one which they enjoy themselves. A good fisherman will provide the best fishing for his paying guests. And, a young farmer with an appreciation for photography will know good scenery when he sees it.

These are just some of the things to be considered before starting a recreational business on unused crop land. Along with them is the need for a-bout liability insurance, competition, the amount of work involved, financing, and the slow going during the first years. But, with luck, hard work, and careful planning non-productive farm land can bring in good income.

Coffee County 4-H Club News

4-H Girls Master Homemaking Unknown In Grandmother's Youth

Many mothers and grandmothers of today's 4-H Club members were themselves 4-H'ers. But unlike their young counterparts, they pursued sewing, cooking and homemaking projects in quite a different manner.

Most of the portable kitchen appliances common in modern homes were either in the luxury or non-existent class two generations ago. The electric sewing machine was heavy and limited. Now sewing machines are streamlined and can do about everything a young seamstress desires--from sewing backwards to making buttonholes.

Frozen foods were unknown to the teen-agers of the 1930's. Today's popular cake mixes and precooked foods were merely simmering in the minds of the researchers.

Automatic washing and drying equipment, do-it-yourself dry cleaning, vast shopping plazas, and the super-super market stocked with thousands of items are only a few of the new developments since mother was a girl.

The remarkable variety of so-called miracle fabrics, patterns and sewing notions (like the zipper) is another boom to 4-H'ers engaged in the 1963 version of home economics.

Grandmother was limited to the familiar silk, wool, or cotton, and hook-and-eye fasteners.

Yet to be thought of were household terms such as drip-dry, steam iron, spray-on starch, fitted sheets, aerosol can, family room and countless others, in addition to learning.

Goodman Boy's Club

The Goodman 4-H Boys elected their officers September 17th.

Officers are as follows: president, Frankie Allen; vice-president, Jerry Bailey; secretary, Jerry McGill; devotional leader, Paul Johnson; song leader, Douglas Wallace, game leader, Donnie Allen, and reporter, Hayward Helms.

Zion Chapel Club

The officers of the 4-H Clubs of the Zion Chapel High School held an officers training meeting September 23, at the Zion Chapel Baptist Church.

The purpose of this meeting was to train all newly elected officers in the duties and responsibilities of their respective office. After meeting in groups according to the office held each assembled for a mock club meeting.

Mrs. Hutchinson, Home Demonstration Agent; Mrs. Fleming, Assistant Home Demonstration Agent; H. B. Thompson, Assistant County Agent, and Miss Peggy Herrington, Extension Staff secretary, conducted this training school.

Top Ranking 4H MemberTo

Be Rewarded

This year, as in the past four decades, members will have a chance to show what they have done and will be rewarded accordingly by Montgomery Ward, the program sponsor.

More than 8,000 home economics members are expected to receive a county honor medal. Top-ranking girl in the state will be a delegate to the National 4-H Club Congress held at Chicago the first week in December.

There Ward officials will personally present six national champions with \$500 college scholarships.

Enrollment in the national 4-H home economics program last year totaled more than 1,220,000, reports the Extension Service. Statistics for 1963 have not yet been compiled, but an increase is predicted.

New Brockton Junior Club

The New Brockton Junior 4-H Club held its regular monthly meeting Friday, October 18.

The following officers presided over the meeting: president, Tommy Smith; vice president, Bill Tindol; secretary, Charles Blanton; recreational leader, Winston Qualls.

Songs were led by Steve Stuckey and devotional was given by Kith Baker, devotional leader.

Mr. Thompson, local

New Brockton Elementary

The New Brockton Elementary 4-H Club meeting was held on October 18.

Roseann Wilson, president, presided over the meeting. Janice Jeter and Cheryl Clark led the singing. Devotion was given by Beverly Hornaby and Donna McCormick led the Pledge to the U.S. Flag and the 4-H Pledge.

Not Telling

A determined young lady strode into a bank and walked straight to the paying teller's window.

"I want to know how much money my husband drew out of this bank last week," she said in an angry voice.

"I'm sorry, madam," said the teller, "but I cannot give you that information."

"But you're the paying teller, aren't you?" she exclaimed.

"Yes," said the teller blandly, "but I am not the teller!" - Dan Bennett
